Hinckley & Bosworth Borough Council

To: Members of the Audit Committee

Mr RB Roberts (Chairman) Mrs R Camamile (Vice-Chairman) Mr DS Cope Mrs L Hodgkins Mr MR Lay Mr KWP Lynch Mr DW MacDonald Mr BE Sutton Miss DM Taylor Mr HG Williams Ms AV Wright

Copy to all other Members of the Council

(other recipients for information)

Dear member,

Please find attached a late report for the meeting of the AUDIT COMMITTEE on THURSDAY, 22 NOVEMBER 2018 at 6.30 pm.

I would be grateful if you could place this with your papers for the meeting.

Yours sincerely

Rebecca Owen Democratic Services Officer

LATE REPORT

(a) Audit progress report (Pages 1 - 14) Report of internal audit. This page is intentionally left blank

Progress Report

Year ending 31 March 2018

Hingkley and Bosworth Borough Council 220 Iovember 2018

Introduction & headlines

Purpose

This report provides an update on progress against the 2018/19 internal audit plan.

It also includes a summary of emerging national issues and developments that may be We have scoping meetings with management scheduled for the following audits: relevant to you as a Council.

Final reports issued

We have finalised 4 audit reports:

	Audit Completed	Overall assurance rating						
Page 2	Financial systems (for Q1 & Q2)	Significant assurance with some improvement required						
	Risk management	Significant assurance with some improvement required						

Work completed

As at the date of preparing this report, we have completed 56.5 days of our annual internal audit plan.

We have completed our fieldwork and issued our draft reports on electoral registration Resourcing and GDPR to management for comment. In addition, audit fieldwork on financial systems for Quarter 3 is in progress at the time of drafting this progress report.

As part of the handover arrangements from the previous internal auditor, it was agreedemerging priorities and to accommodate timescales requested by management. that management would formally review the 'open' recommendations and close these where judged to be out of date, superseded or addressed. We have reviewed

management's proposal for closure of previous recommendations and provided

the audit committee agenda papers. In the future, we will report progress on audit

recommendations to the committee at each meeting.

Work planned

We have discussed the scope of the work for the crematorium review with the project sponsor and we are currently drafting the terms of reference for our review.

- Private Sector Housing
- Housing repairs
- Housing revenue account (HRA) business plan

The estates review is planned for quarter 4 and we have requested a set up meeting to that we can scope our work.

Changes to the audit plan

At management's request, our debt management review, as part of the financial systems work has been slightly modified. We have undertaken a review of sundry debts but we will consider housing and revenues debts as part of the other planned work in these areas. The sundry debt work is nearing completion and will be reported at the next committee meeting.

At management's request, we have brought forward our review of the revenues and benefits partnership from Q4 to Q3. This work is currently ongoing and we plan to report to the Revenues and Benefits Partnership in January 2019. To facilitate this, we propose moving The HRA business plan review to Q4 to enable us to bring this review forward.

We confirm that we have sufficient internal audit team members available to deliver the remainder of the internal audit plan on time. We will flex the plan where needed for

Sector updates

challenge where necessary. This position statement, prepared by management, is with he have provided the latest sector updates for your information in Appendix 1.

Progress against 2017/18 internal audit plan

Audit	Planned days	Start date	APB agreed	Fieldwork started	Fieldwork completed	Debrief held	Draft report sent	Mgt response received	Final report sent	Days used

Attendance at audit committee meetings	2	Ongoing								1
Contingency	10	Not used								0
Sub-total	22									7
Total	130									56.5

Appendix 1: Sector Update

CIPFA consultation – Financial Resilience Index

The Chartered Institute of Public Finance and Accountancy (CIPFA) has consulted on its plans to provide an authoritative measure of local authority financial resilience via a new index. The index, based on publically available information, will provide an assessment of the relative financial health of each English council.

CIPFA has designed the index to provide reassurance to councils who are financially stable and prompt challenge where it may be needed. To understand the sector's views, CIPFA -invited all interested parties to respond to questions it has put forward in the consultation by the 24 August.

The decision to develop an index is driven by CIPFA's desire to support the local overnment sector as it faces a continued financial challenge. The index will not be a predictive model but a diagnostic tool – designed to identify those councils displaying consistent and comparable features that will highlight good practice, but crucially, also point to areas which are associated with financial failure. The information for each council will show their relative position to other councils of the same type. Use of the index will support councils in identifying areas of weakness and enable them to take action to reduce the risk of financial failure. The index will also provide a transparent and independent analysis based on a sound evidence base.

The proposed approach draws on CIPFA's evidence of the factors associated with financial stress, including:

- running down reserves
- · failure to plan and deliver savings in service provision
- shortening medium-term financial planning horizons.
- gaps in saving plans
- · departments having unplanned overspends and/or undelivered savings.

Conversations with senior practitioners and sector experts have elicited a number of additional potential factors, including:

- · the dependency on external central financing
- the proportion of non-discretionary spending e.g. social care and capital financing as a proportion of total expenditure
- an adverse (inadequate) judgement by Ofsted on Children's services
- changes in accounting policies (including a change by the council of their minimum revenue provision)
- · poor returns on investments
- · low level of confidence in financial management.

The consultation document proposes scoring six key indicators:

- 1. The level of total reserves excluding schools and public health as a proportion of net revenue expenditure.
- 2. The percentage change in reserves, excluding schools and public health, over the past three years.
- 3. The ratio of government grants to net revenue expenditure.
- 4. Proportion of net revenue expenditure accounted for by children's social care, adult social care and debt interest payments.
- 5. Ofsted overall rating for children's social care.
- 6. Auditor's VFM judgement.

CIPFA Consultation

Challenge question:

Has your Head of Finance briefed members on the Council's response to the Financial Resilience Index consultation?

MHCLG – Social Housing Green Paper

The Ministry of Housing, Communities and Local Government (MHCLG) published the Social Housing Green Paper, which seeks views on government's new vision for social housing providing safe, secure homes that help people get on with their lives.

With 4 million households living in social housing and projections for this to rise annually, it is rucial that MHCLG tackle the issues facing both residents and landlords in social housing.

The Green Paper aims to rebalance the relationship between residents and landlords, tackle Destigma and ensure that social housing can be both a stable base that supports people when othey need it and also support social mobility. The paper proposes fundamental reform to

ensure social homes provide an essential, safe, well managed service for all those who need it.

To shape this Green Paper, residents across the country were asked for their views on social housing. Almost 1,000 tenants shared their views with ministers at 14 events across the country, and over 7,000 people contributed their opinions, issues and concerns online; sharing their thoughts and ideas about social housing,

The Green Paper outlines five principles which will underpin a new, fairer deal for social housing residents:

- · Tackling stigma and celebrating thriving communities
- Expanding supply and supporting home ownership
- Effective resolution of complaints
- · Empowering residents and strengthening the regulator
- · Ensuring homes are safe and decent

Consultation on the Green Paper is now underway, which seeks to provide everyone with an opportunity to submit views on proposals for the future of social housing and will run until 6 November 2018.

The Green Paper presents the opportunity to look afresh at the regulatory framework (which was last reviewed nearly eight years ago). Alongside this, MHCLG have published a Call for Evidence which seeks views on how the current regulatory framework is operating and will inform what regulatory changes are required to deliver regulation that is fit for purpose.

The Green Paper acknowledges that to deliver the social homes required, local authorities will need support to build by:

- · allowing them to borrow
- exploring new flexibilities over how to spend Right to Buy receipts
- not requiring them to make a payment in respect of their vacant higher value council homes

As a result of concerns raised by residents, MHCLG has decided not to implement at this time the provisions in the Housing and Planning Act to make fixed term tenancies mandatory for local authority tenants.

The Green Paper is available on the MHCLG's website at: https://www.gov.uk/government/consultations/a-new-deal-for-social-housing

Social Housing Green Paper Consultation

Challenge question:

What does the Social Housing Green Paper mean for your local authority?

MHCLG – Business rate pilots

The Secretary of State has invited more councils to apply for powers to retain the growth in their business rates under the new pilots. The pilots will see councils rewarded for supporting local firms and local jobs and ensure they benefit directly from the proceeds of economic growth.

From April 2019, selected pilot areas will be able to retain 75% of the growth in income raised through business rates, incentivising councils to encourage growth in Usiness and on the high street in their areas. This will allow money to stay in communities and be spent on local priorities - including more funding to support of rontline services.

→ this follows the success of previous waves of business rates retention pilots, launched in a wide range of areas across country in 2017 and 2018.

The current 50% business rates retention scheme is yielding strong results and in 2018 to 2019 it is estimated that local authorities will keep around £2.4 billion in business rates growth.

Findings from the new round of pilots will help the government understand how local authorities can smoothly transition into the proposed system in 2020.

Proposals will need to show how local authorities would 'pool' their business rates and work collaboratively to promote financial sustainability, growth or a combination of these.

Alongside the pilots, the government will continue to work with local authorities, the Local Government Association, and others on reform options that give local authorities more control over the money they raise and are sustainable in the long term.

The invitation is addressed to all authorities in England, excluding those with ongoing business rates retention pilots in devolution areas and London. Due to affordability constraints, it may be necessary to assess applications against selection criteria, which will include:

- Proposed pooling arrangements operate across a functional economic area
- Proposal demonstrates how pooled income from growth will be used across the pilot area to either boost further growth, promote financial sustainability or a combination of these
- Proposal sets out robust governance arrangements for strategic decision-making around management of risk and reward and outlines how these support the participating authorities' proposed pooling arrangements

Any proposals will need to show that all participating authorities have agreed to become part of the suggested pool and share additional growth as outlined in the bid. The Section 151 officer of each authority will need to sign off the proposal before submission.

Proposal for new pilots must be received the MHCLG by midnight on Tuesday 25th September 2018.

Business Rates pilots 2019/20

Challenge question:

Has your authority applied to be a Business Rates pilot?

Institute of Fiscal Studies: Impact of 'Fair Funding Review'

The IFS has published a paper that focuses on the issues arising in assessing the spending needs of different councils. The government's 'Fair Funding Review' is aimed at designing a new system for allocating funding between councils. It will update and improve methods for estimating councils' differing abilities to raise revenues and their differing spending needs. The government is looking for the new system to be simple and transparent, but at the same time obust and evidence based.

Counting for councils' spending needs

The IFS note that the Review is seeking a less subjective and more transparent approach which is focused on the relationship between spending and needs indicators. However, like any funding system, there will be limitations, for example, any attempt to assess needs will be affected by the MHCLG's funding policies adopted in the year of data used to estimate the spending needs formula. A key consideration will be the inherently subjective nature of 'spending needs' and 'needs indicators', and how this will be dealt with under any new funding approach. Whilst no assessment of spending needs can be truly objective, the IFS state it can and should be evidence based.

The IFS also note that transparency will be critical, particularly in relation to the impact that different choices will have for different councils, such as the year of data used and the needs indicators selected. These differentiating factors and their consequences will need to be understood and debated.

Accounting for councils' revenues

The biggest source of locally-raised revenue for councils is and will continue to be council tax. However, there is significant variation between councils in the amount of council tax raised per person. The IFS identify that a key decision for the Fair Funding Review is the extent wo which tax bases or actual revenues should be used for determining funding levels going forward.

Councils also raise significant sums of money from levying fees and charges, although this varies dramatically across the country. The IFS note that it is difficult to take account of these differences in a new funding system as there is no well-defined measure of revenue raising capacity from sales, fees and charges, unlike council tax where the tax base can be used.

The overall system: redistribution, incentives and transparency

The IFS also identify that an important policy decision for the new system is the extent to which it prioritises redistribution between councils, compared to financial incentives for councils to improve their own socio-economic lot. A system that fully and immediately equalises for differences in assessed spending needs and revenue-raising capacity will help ensure different councils can provide similar standards of public services, However, it would provide little financial incentive for councils to tackle the drivers of spending needs and boost local economics and tax bases.

Further detail on the impact of the fair funding review can be found in the full report

https://www.ifs.org.uk/uploads/publications/comms/R 148.pdf.

The Vibrant Economy Index a new way to measure success

Our Vibrant Economy Index uses data to provide a robust, independent framework to help everyone understand the challenges and opportunities in their local areas. We want to start a debate about what type of economy we want to build in the UK and spark collaboration between citizens, businesses and place-shapers to make their places thrive.

Places are complex and have an intrinsic impact on the people and businesses within them. Economic growth doesn't influence all of the elements that are important to people's lives – so we shouldn't use GDP to measure success. We set out to create another measure for Understanding what makes a place successful.

total, we look at 324 English local authority areas, taking into account not only economic prosperity but health and happiness, inclusion and equality, environmental resilience, mmunity and dynamism and opportunity. Highlights of the index include:

- Traditional measures of success gross value added (GVA), average workplace earning and employment do not correlate in any significant way with the other baskets. This is particularly apparent in cities, which despite significant economic strengths are often characterised by substantial deprivation and low aspiration, high numbers of long-term unemployment and high numbers of benefit claimants
- The importance of the relationships between different places and the subsequent role of infrastructure in connecting places and facilitating choice. The reality is that patterns of travel for work, study and leisure don't reflect administrative boundaries. Patterns emerge where prosperous and dynamic areas are surrounded by more inclusive and healthy and happy places, as people choose where they live and travel to work in prosperous areas.
- The challenges facing leaders across the public, private and third sector in how to support those places that perform less well. No one organisation can address this on their own. Collaboration is key.

Visit our website (<u>www.grantthornton.co.uk</u>) to explore the interactive map, read case studies and opinion pieces, and download our report Vibrant Economy Index: Building a better economy.

Vibrant Economy app

To support local collaboration, we have also developed a Vibrant Economy app. It's been designed to help broaden understanding of the elements of a vibrant economy and encourage the sharing of new ideas for – and existing stories of – local vibrancy.

We've developed the app to help people and organisations:

- see how their place performs against the index and the views of others through an interactive quiz
- · post ideas and share examples of local activities that make places more vibrant
- · access insights from Grant Thornton on a vibrant economy.

We're inviting councils to share it with their employees and the wider community to download. We can provide supporting collateral for internal communications on launch and anonymised reporting of your employees' views to contribute to your thinking and response.

To download the app visit your app store and search 'Vibrant Economy'

- Fill in your details to sign up, and wait for the verification email (check your spam folder if you don't see it)
- Explore the app and take the quiz
- · Go to the Vibrant Ideas section to share your picture and story or idea

Supply Chain Insights tool helps support supply chain assurance in public services

Grant Thornton UK LLP has launched a new insights and benchmarking platform to support supply chain assurance and competitor intelligence in public services.

The Supply Chain Insights service is designed for use by financial directors and procurement professionals in the public sector, and market leaders in private sector suppliers to the public sector. It provides users with a detailed picture of contract value and spend with their supply tain members across the public sector. The analysis also provides a robust and granular we on the viability, sustainability, market position and coverage of their key suppliers and **O** of the provides.

The platform is built on aggregated data from 96 million invoices and covers £0.5 trillion of spending. The data is supplemented with financial standing data and indicators to give a fully rounded view. The service is supported by a dedicated team of analysts and is available to access directly as an on-line platform.

Phillip Woolley, Partner, Grant Thornton UK LLP, said:

"The fall-out from the recent failure of Carillion has highlighted the urgent need for robust and ongoing supply chain monitoring and assurance. Supply Chain Insights provides a clear picture of your suppliers' activities across the sector, allowing you to understand risks, capacity and track-record. We think it's an indispensable resource in today's supplier market."

The tool enables you to immediately:

- access over 96 million transactions that are continually added to
 - segment invoices by:
 - organisation and category
 - --- service provider
 - --- date at a monthly level
- benchmark your spend against your peers
- identify:
 - --- organisations buying similar services
 - --- differences in pricing
 - --- the leading supplier
- · see how important each buyer is to a supplier
- · benchmark public sector organisations' spend on a consistent basis
- · see how much public sector organisations spend with different suppliers

Supply Chain Insights forms part of the Grant Thornton Public Sector Insight Studio portfolio of analytics platforms.

In good company: Latest trends in local authority trading companies

Our recent report looks at trends in LATC's (Local Government Authority Trading Companies).These deliver a wide range of services across the country and range from wholly owned companies to joint ventures, all within the public and private sector.

Outsourcing versus local authority trading companies

The rise of trading companies is, in part, due to the decline in popularity of outsourcing. The majority of outsourced contracts operate successfully, and continue to deliver significant savings. But recent high profile failures, problems with inflexible contracts and poor contract management mean that outsourcing has fallen out of favour. The days of large scale outsourcing of council services has gone.

O Advantages of local authority trading companies

- Authorities can keep direct control over their providers
- Opportunities for any profits to be returned to the council
- Provides suitable opportunity to change the local authority terms and conditions, particularly with regard to pensions, can also bring significant reductions in the cost base of the service
- Having a separate company allows the authority to move away from the constraints of the councils decision making processes, becoming more agile and responsive to changes in demand or funding
- Wider powers to trade through the Localism act provide the company with the opportunity to win contracts elsewhere

Choosing the right company model

The most common company models adopted by councils are:

Wholly owned companies are common because they allow local authorities to retain the risk and reward. And governance is less complicated. Direct labour organisations such as Cormac and Oxford Direct Services have both transferred out in this way.

JVs have become increasingly popular as a means of leveraging growth. Pioneered by Norse, Corserv and Vertas organisations are developing the model. Alternatively, if there is a social motive rather than a profit one, the social enterprise model is the best option, as it can enable access to grant funding to drive growth.

Getting it right through effective governance

While there are pitfalls in establishing these companies, those that have got it right are: seizing the advantages of a more commercial mind-set, generating revenue, driving efficiencies and improving the quality of services. By developing effective governance they can be more flexible and grow business without micromanagement from the council.

LATC's need to adapt for the future

- · LATC's must adapt to developments in the external environment
 - These include possible changes to the public procurement rules after Brexit and new local authority structures. Also responding to an increasingly crowded and competitive market where there could me more mergers and insolvencies.
- Authorities need to be open to different ways of doing things, driving further developments of new trading companies. Relieving pressures on councils to find the most efficient ways of doing more with less in todays austere climate.

Overall, joint ventures can be a viable alternative delivery model for local authorities. Our research indicates that the numbers of joint ventures will continue to rise, and in particular we expect to see others follow examples of successful public-public partnerships.
