

<b>National Policy Guidance</b>	
National Planning Practice Guidance 2014	<p>The National Planning Practice Guidance (NPPG) was published on 6 March 2014 as a web-based resource. The NPPG has cancelled a number of previous planning guidance documents including the majority of previous Circulars and Letters to Chief Planning Officers. The NPPG was introduced following the Review of Government Planning Practice Guidance carried out by Lord Taylor with the aim of making the planning system simpler, clearer and easier for people to use. The guidance contains 41 categories from 'Advertisements' to 'Water Supply'.</p> <p>The NPPG is guidance designed to supplement to the National Planning Policy Framework (NPPF). It is therefore a material consideration in planning decisions.</p>
National Planning Policy Framework 2012	<p>The NPPF reiterates the statutory requirement that applications for planning permission must be determined in accordance with the development plan, unless material considerations indicate otherwise. The NPPF is a material consideration in planning decisions.</p> <p>It also states that the document should be read in conjunction with the newly released policy statement on Gypsies and Travellers.</p> <p>The purpose of the planning system is to contribute to the achievement of sustainable development. There are 3 dimensions to sustainable development:</p> <ul style="list-style-type: none"> <li>• An economic role – contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places to support growth and innovation</li> <li>• A social role – supporting strong, vibrant and healthy communities by providing the supply of housing required to meet the needs of present and future generations, and by creating a high quality built development with accessible local services;</li> <li>• An environmental role – contributing to protecting and enhancing our natural, built and historic environment.</li> </ul> <p>At the heart of the NPPF is a <b>presumption in favour of sustainable development</b>, which should be seen as a golden thread running through both plan-making and decision making. For decision making this means:</p> <ul style="list-style-type: none"> <li>• Approving development proposals that accord with the development plan without delay; and</li> <li>• Where the development plan is absent, silent or relevant policies are out of date, granting permission unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or specific policies in this Framework indicate development should be restricted. (Para 14).</li> </ul>

	<p>Local planning authorities should approach decision-taking in a positive way to foster the delivery of sustainable development. The relationship between decision making and plan-making should be seamless, translating plans into high quality development on the ground. (Para 186). They should seek for solutions rather than problems and decision-takers at every level should seek to approve applications for sustainable development where possible.</p> <p>Early engagement in pre-application discussions is encouraged where it is offered. Developers should be encouraged to engage with the community.</p> <p>The planning system is plan-led. Planning law requires that applications for planning permission must be determined in accordance with the development plan, unless material considerations indicate otherwise. The Framework is a material consideration in planning decisions. (Para 196)</p> <p>In assessing and determining development proposals, local planning authorities should apply the presumption in favour of sustainable development (Para 197).</p> <p><u>Implementation</u></p> <p>The policies in the NPPF apply from the day of publication (27<sup>th</sup> March 2012).</p> <p>For 12 months from the day of publication, decision makers may continue to give full weight to relevant policies adopted since 2004 even if there is a limited degree of conflict with the Framework.</p> <p>The Hinckley and Bosworth Local Plan was adopted in February 2001, as such it is necessary to review all saved local plan policies according to their consistency with the framework. Due weight must then be given according to their consistency with the NPPF. These are appraised within each application late item.</p> <p>For clarity it should be noted that the following national policy guidance documents referred to in the main agenda are superseded by the NPPF:</p> <p>Circular 05/05  Circular 01/06  NPPF (Draft)  All Planning Policy Guidance and Statements</p>
The Community Infrastructure Levy (CIL) Regulations 2010	Part 11, Regulation 122 provides a statutory duty in respect of planning obligations and requires them to be necessary, directly related and fairly and reasonably related in scale and kind to the development proposed. The Regulation does not replace Circular 05/2005 but gives it a statutory foothold in planning legislation.
Planning Policy for Traveller Sites	This sets out the Government's planning policy for traveller sites and should be read in conjunction with the NPPF. The

March 2012	Government's overarching aim is to ensure fair and equal treatment for travellers, in a way that facilitates the traditional and nomadic way of life of travellers while respecting the interests of the settled community.
------------	---

<b>Hinckley and Bosworth Core Strategy 2009</b>	
Spatial Objective 12: Climate Change and Resource Efficiency	To minimise the impacts of climate change by promoting the prudent use of resources through sustainable patterns of development, investment in green infrastructure, minimising the use of resources and energy, increasing reuse and recycling of natural resources, increasing the use of renewable energy technologies and minimising pollution, including greenhouse gas emissions.
Policy 1	Development in Hinckley: supports Hinckley's role as a sub-regional centre and sets out the criteria to achieve this. It makes provision for a minimum of 1120 new residential dwellings, seeks to diversify the existing housing stock in the town centre to cater for a range of house types and sizes, seeks to ensure there is a range of employment opportunities within Hinckley and to allocate land for new office development within or adjoining the Hinckley Town Centre Area Action Plan boundary. It supports the expansion of the creative industries job market, the provision of new retail space, the redevelopment of the railway station to deliver a transport interchange, the provision of a new bus station, transport improvements, tourism development and the development of new leisure facilities.
Policy 3	Development in Barwell: supports the regeneration of Barwell. It makes provision for a minimum of 45 new residential dwellings, seeks to diversify the existing housing stock to cater for a range of house types and sizes, allocates land for the development of a mixed use sustainable urban extension to the west of Barwell, seeks to ensure there is a range of employment opportunities within Barwell, supports the regeneration of Barwell local centre including public realm improvements, traffic calming measures and provision of additional retail floorspace. It supports the development of new leisure facilities and sporting hub on land off the A47 in the vicinity of the Hinckley United Football Stadium. It requires transport improvements and supports the development of the tourism industry.
Policy 16	Housing Density, Mix and Design: seeks to ensure that all new residential developments provide a mix of types and tenures appropriate to the applicable household type projections.
Policy 18	Provision of Sites for Gypsies, Travellers and Travelling Showpeople: states that the council will allocate land for 42 residential pitches, and planning permission for sites will be granted where certain criteria are met including siting adjacent to the settlement boundary of any Key Rural Centre or Rural Village or the site is located within a reasonable distance of local services and has safe highway access.
Policy 19	Green Space and Play Provision: seeks to ensure that all residents have access to sufficient, high quality and accessible green spaces and play areas.
Policy 24	Sustainable Design and Technology: seeks to ensure all new development meets specified sustainable design and technology

	standards.
--	------------

<b>Hinckley and Bosworth Local Plan 2001</b>
--

<b>INFRASTRUCTURE</b>
-----------------------

Policy IMP1	Contributions towards the provision of infrastructure and facilities: requires contributions towards the provision of infrastructure and facilities to serve the development commensurate with the scale and nature of the development proposed. <i>This policy is consistent with the intentions of the NPPF.</i>
-------------	---

<b>HOUSING</b>
----------------

Policy RES5	Residential Proposals on Unallocated Sites: states that on sites that are not specifically allocated in the plan for housing, planning permission will only be granted for new residential development if the site lies within a settlement boundary and the siting, design and layout of the proposal does not conflict with the relevant plan policies. <i>This policy is consistent with the intentions of the NPPF if the development is within the settlement boundary but has limited consistency in all other locations.</i>
-------------	--

<b>CONSERVATION AND BUILT ENVIRONMENT</b>
---

Policy BE1	Design and Siting of Development: requires that planning permission for development proposals will be granted where they: complement or enhance the character of the surrounding area with regards to scale, layout, density, materials and architectural features; avoid loss of open spaces; has regard to safety; incorporates design features which reduce energy consumption, encourages recycling and minimises impact on local environment; incorporates a high standard of landscaping; meets DDA requirements where necessary; ensure adequate highway visibility and parking standards and manoeuvring facilities; do not adversely affect the amenities of neighbouring properties; and would not be prejudicial to the comprehensive development of a larger area of land of which the development forms part. For residential proposes development should incorporate urban design standards, ensure adequate degree of amenity and privacy and provide sufficient amenity space. <i>Criteria a - i of this policy are consistent with the NPPF and as such the policy should be given weight.</i>
------------	--

Policy BE5	The Setting of a Listed Building: seeks to preserve and enhance the setting of listed buildings by appropriate control through the design of new development in the vicinity. <i>This policy is consistent with the intentions of the NPPF.</i>
------------	--

Policy BE27	Wind Power: supports proposals for wind farms and individual wind turbines where they are capable of supporting the generation of wind power; they are sensitively located so that its visual impact is minimised and will not be unduly prominent; they do not have detrimental impact due to noise or other forms of nuisance; they are located a minimum distance that is equal to its own height away from any public highway or publicly accessible area; they would not involve the erection of overhead power lines to connect to the national grid that would have an adverse impact on the landscape of the area. <i>Criteria a, b and c are consistent with the intentions of the NPPF and should be afforded weight, however criteria d and e are</i>
-------------	---

	<i>considered to be inconsistent as the NPPF contains no guidance on these matters.</i>
<b>THE NATURAL ENVIRONMENT</b>	
Policy NE5	<p>Development in the Countryside: states that the countryside will be protected for its own sake and that planning permission will be granted for built and other forms of development in the countryside provided that the development is either:-</p> <ul style="list-style-type: none"> <li>a) Important to the local economy and cannot be provided within or adjacent to an existing settlement; or</li> <li>b) For the change of use, reuse or extension of existing buildings, particularly those of historic value; or</li> <li>c) For sport or recreation purposes.</li> </ul> <p>And only where the following criteria are met:-</p> <ul style="list-style-type: none"> <li>i) It does not have an adverse effect on the appearance or character of the landscape.</li> <li>ii) It is in keeping with the scale and character of existing buildings and the general surroundings.</li> <li>iii) Where necessary it is effectively screened by landscaping or other methods.</li> <li>iv) The proposed development will not generate traffic likely to exceed the capacity of the highway network or impair road safety.</li> </ul> <p><i>This policy is consistent with the intentions of the NPPF for rural enterprise proposals but has limited consistency in all other respects</i></p>
Policy NE10	<p>Local Landscape Improvement Areas: identifies sites as landscape improvement areas and requires proposals in these areas to include comprehensive landscaping proposals.</p> <p><i>This policy has limited consistency with the intentions of the NPPF.</i></p>
Policy NE12	<p>Landscaping Schemes: requires proposals for development to make provision for further landscaping where appropriate.</p> <p><i>This policy is partially consistent with the intentions of the NPPF.</i></p>
Policy NE14	<p>Protection of Surface Waters and Groundwater Quality: seeks to ensure that developments do not compromise the quality of the water environment.</p> <p><i>This policy has limited consistency with the intentions of the NPPF as it is too specific</i></p>
<b>TRANSPORTATION</b>	
Policy T5	<p>Highway Design and Vehicle Parking Standards: refers to the application of appropriate standards for highway design and parking provision for new development</p> <p><i>This policy is consistent with the intentions of the NPPF.</i></p>
<b>RECREATION AND TOURISM</b>	
Policy REC3	<p>New Residential Development – Outdoor Play Space for Children: requires the appropriate level of open space to be provided within development sites or, alternatively, a financial contribution to be negotiated towards the provision of new recreation facilities within the vicinity of the site or towards the improvement of existing facilities in the area.</p> <p><i>This policy is consistent with the intentions of the NPPF.</i></p>

<b>Supplementary Planning Guidance / Documents</b>	
New Residential Development SPG	Provides guidance on design issues to ensure new developments are well integrated into their surroundings, offer a good standard of security and amenity to future residents, protect amenity of existing occupiers and are locally distinctive in their appearance.
Play and Open Space Guide 2008 SPD	Sets out the Boroughs approach when considering applications for development likely to generate a demand for open space and play facilities.
Sustainable Design 2008 SPD	Promotes sustainable development to contribute towards a greener future. It offers best practice guidance to developers in the design process, and requires an effective contribution of sustainable energy on each new building across the Borough.
Design of Farm Buildings SPG	Sets out guidance on user requirements, siting, design and landscaping in order to achieve a building that meets the practical needs it is being put up for whilst ensuring it is also sympathetically designed with respect to its surroundings. The guidance covers the development of farm buildings for agricultural purposes only.

<b>Other Material Policy Guidance</b>	
Landscape Character Assessment 2006	An evidence base document that defines areas with consistent distinctive characteristics resulting from the interaction of geology, landform, soils, vegetation, land use and human settlement. It provides an understanding of the landscape, its evolution and future pressures along with future management strategies. It also studies the urban character through assessing street patterns, urban form, landmark buildings and common building styles and materials to define the local vernacular of the principle settlements.
ETSU-R-97 'The Assessment & Rating of Noise from Wind Farms	Report of the Noise Working Group of developers, noise consultants, environmental health officers and other professionals set up in 1995 by the Department of Trade and Industry through ETSU (Energy Technology Support Unit). This is not a report of government and does not replace other statutory legislation or government guidance. The report represents the consensus view of the group of experts to describe a framework for the measurement and assessment of wind farm noise and gives indicative noise levels thought to offer a reasonable degree of protection to wind farm neighbours, without placing unreasonable restrictions on wind farm development or adding unduly to the costs and administrative burdens on wind farm developers or local authorities. The Planning Practice Guidance for Renewable and Low Carbon Energy states that the report should be used by local planning authorities when assessing and rating noise from wind energy developments.
Renewable Energy Capacity Study (2013)	An evidence base document commissioned in 2013 to assess the technical and deployable potential for renewable and low carbon energy proposals within the Borough up until 2026.
